Education

2021– **PhD in Economics**, Stanford University (expected June 2027)
2020–2021 **MSc in Economics**, London School of Economics and Political Science
2015–2019 **AB in Economics**, Princeton University

Research Fields

Primary: Macroeconomics, Development Economics

Secondary: Growth, Environmental Economics

Migrant Networks and Climate Change

Job Market Paper

(with Shifrah Aron-Dine)

Migration as an adaptation strategy to climate change depends on whether people move in response to climate change and where they choose to relocate. A widespread finding in specific migration episodes is that people migrate to places with large diasporas — if this is an important force in international migration, it could also be key for climate adaptation. Using global migration and temperature data, we show that migrant networks mirror origin-country climate risk, and that adaptation through migration has been limited to date. We formalize the insurance value of networks in a model with climate-induced productivity shocks, showing that this value depends on the correlation between existing migrant networks and the spatial covariance of climate shocks. Theoretically, the net effect of network-driven migration on adaptation is ambiguous: history de-

pendence slows reallocation to safer places, while network feedback can amplify moves to better ones.

Misallocation versus Inequality

(with Chang-Tai Hsieh, Peter Klenow, and Emma Rockall)

A stream of research contends that input misallocation takes a toll on aggregate productivity. If this is true, then why does it persist? One answer could be that policies to mitigate misallocation exacerbate inequality. We explore this possibility using data on Indian manufacturing firms and households in a model with both heterogeneous firms and workers. We focus on size-dependent misallocation given the ample evidence for size-dependent policies in India. We find that abandoning such policies would boost aggregate manufacturing productivity by 1–4%, but would also raise the skill premium and overall inequality, since larger firms employ more skilled workers and earn more profits for their owners. We estimate that size-based reforms could lower consumption-equivalent welfare on the order of 9%. This suggests removing misallocation may be unpopular because it worsens consumption inequality.

Work in Progress

The Growth Implications of Heterogeneous Firm-to-Firm Knowledge Spillovers

(with Reiko Laski)

Locality, Volatility, and Firm Dynamics in Developing Countries

Selected Policy Work

2022–	The State of Youth Unemployment (with West Africa Vocational Education Academies) <i>An original survey of young Nigerians in Lagos, examining their experience of unemployment and underemployment.</i>
-------	---

Selected Presentations

2026	NBER Summer Institute (Growth and Long-run Macroeconomics); Climate Adaptation Meeting, AEA Meetings; Stanford Macro Workshop; Stanford Macroeconomics Seminar (scheduled)
2023–2025	UC Berkeley EEE-fest; Stanford Macro Day; Stanford Macro Workshop; Stanford 3rd Year Seminar

Grants, Fellowships, and Honors

2026–2027	SIEPR Ely Graduate Student Fellowship, Stanford University
2026	Community Impact Award, Stanford University
2023–2026	RAISE Doctoral Fellowship, Stanford University

2021–2023	EDGE Doctoral Fellowship, Stanford University
2021	Graduated with distinction, London School of Economics and Political Science
2019	Phi Beta Kappa, Princeton University
2019	Graduated <i>summa cum laude</i> , Princeton University
2017	Shapiro Prize for Academic Excellence, Princeton University

Teaching Experience

2024–2025	Teaching Assistant, ECON 1: Principles of Economics, Stanford University
2018–2019	Course Assistant, International Monetary Economics, Princeton University
2016–2019	Economics Tutor, McGraw Center, Princeton University

Relevant Skills

Clearance: Special Sworn Status Researcher, U.S. Census Bureau

Software: Python, R, Stata, SAS, SPSS, Tableau

Languages: English (native), Akan (native), Spanish (basic)

Professional Experience

2020–2021	Research Assistant at International Growth Centre (IGC)
2018–2020	Economic Consultant at Edgeworth Economics LLC, Washington, D.C.
2018	Intern at Women’s Microfinance Initiative (WMI), Uganda

Professional Activities and Service

2026	Moderator, Stanford Economics Graduate Career Day Policy Panel
2024–2026	Co-chair of Stanford Women in Macro, Stanford University
2024	Mentor, Spelman-Sloan-Stanford Mentorship Program
2023–2025	EDGE Fellowship Mentor, Stanford University
2022–	Growth Reading Group, Stanford University
2022–2023	Recruitment Committee, Department of Economics, Stanford University
2020–2021	Programme for African Leadership, London School of Economics and Political Science
2017–2018	Outreach Chair, Princeton Women in Economics & Policy, Princeton University
